

# DO YOUR PART BE ENERGY SMART

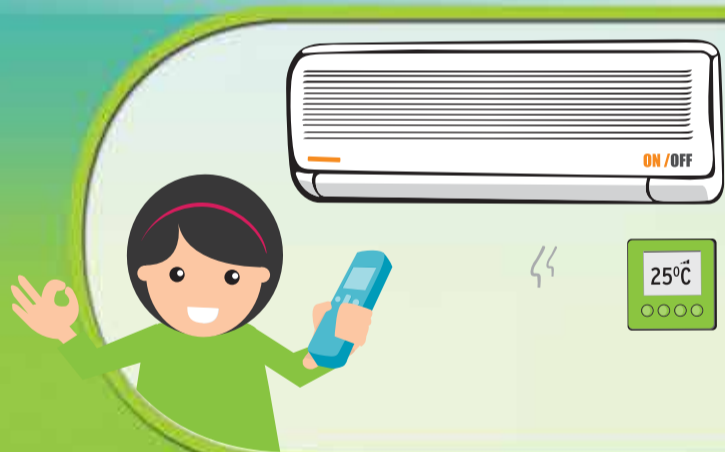

Do what's right, **save energy** by switching off the fans and lights.

Beat the heat with a fan instead of an air-con. **Save** around **\$460** a year!

Energy used by  
**1 air-con**  
is the same as  
**13 fans**

Keep it at 25 °C or higher.  
**Save** about **\$15** a year for every degree raised.

**Save energy** and **water** by turning off the tap while soaping up or shampooing your hair.

**Save** even more by taking **shorter** showers!

More than **80%** of households practise this tip

Leaving the storage water heater on can land you in hot water. **Save** an additional **\$110** a year by switching off the storage water heater after use.
